Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 October 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 13 and 14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.

DETAILED ACTION

This is in response to Applicant's Amendment filed on 10/4/2008. Applicant has cancelled claims 7-12, and added claims 13 and 14. This action is FINAL.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim is rejected because the claim recites data exchange between radio devices, which implies signals. Signals cannot be claimed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Hauhia (US Pat. No. 7,058,542). The Office disagrees with the Applicant's assertion that Hauhia does not disclose the subject matter recited in claims 13 and 14.

Regarding claim 13

Hauhia teaches a method for data exchange between field devices of automation technology, whereby the field device determine and/or influence a process variable, comprising the steps of:

providing each of the field devices with a field bus interface for connection with a field bus; (*see abstract, col. 2, lines 47-67, col. 3, lines 1-67*)

providing a radio unit; (*see abstract, col. 2, lines 47-67, col. 3, lines 1-67*)

exchanging data concerning process conditions via the radio units of the field devices; (*see abstract, col. 2, lines 47-67, col. 3, lines 1-67*)and

conducting an evaluation of the state of the process by the aid of the exchanged data or exchanging, configuring and parametering data via the radio units for duplicating the properties of two field devices, or sending software updates via the field bus to an elected field device and transmitting the software updates from the elected field device to further field devices via radio transmission. (*see claim 8 and col. 7 lines 20-50*).

Regarding claim 14

The method as claimed in claim 13, wherein: the radio unit works according to the Bluetooth standard. (*see col. 6, lines 1-40*)

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
